PROFESSIONAL EXPERIENCE

FanFootage.com, Dublin, Ireland

Co-Founder, CTO

January 2013 – present

Crowd sourced event videos sound terrible. We sync the fans video with artist approved audio live from that event to within 5 ms with our own patented algorithms.

Skills used: FFmpeg, AWS, all API driven Rails, scaling, Redis and everything in-between to bring a stable service live

SeenBefore.com, Dublin, Ireland

Founder, CEO

September 2011 – November 2012

44 percent of searches is for something you already seen before, so created search engine living on Google.com. Based out of DogPatch Labs. Growing at thousands of users a day, when I shut it down. YC interview 2012.

<http://lifehacker.com/5946009/seenbefore-searches-only-recently-visited-sites-on-google-is-really-handy>
<https://news.ycombinator.com/item?id=4564146>

Skills used: Rails, MongoDB, Backbone, Coffeescript, Browser Extension development, scaling, Redis and everything in-between to bring a stable service live

Betdash.com within Paddypower PLC, Dublin, Ireland

Rails Developer

September 2010 – June 2011

Working within a startup style environment, mostly in backend, creating a new social sports betting game. Founders out of a startup incubator in U.S.A.

Agile Development, deploying production code multiple times a day with continuous integration, unit tests, code reviews and pair programming.

Skills used: Ruby 1.8.7 + 1.9.2, Rails, Blueprints, AWS, Ruby Gcc, EngineYard, web security, scaling, Redis, NewRelic, Hoptoad, PivotalTracker, Github, and everything in-between to bring a stable service live

Web Developer within Paddypower PLC

July 2009 – September 2010

Doing project estimations, system architecture and coding used on PaddyPower's homepage(millions of visitors a week).

Skills used: LAMP, caching, Web Penetration Testing

Echodio.com, San Francisco, USA

Co-founder

November 2008 – April 2009

Echodio.com kept iTunes music libraries in sync, securely backed up and playable from PC/Phone/TV. Involved in every aspect from product concept to eventual launch at **SxSW** and on **Techerunch**. Worked mainly on the backend development of the service.

Skills used: Ruby, Rails, RubyMine, Php, Unit testing and Test Driven Development(TDD), Scrum and Agile Development methods, Bash, Cruise Control, AWS, Rcov, competition analysis, Postgres, Boxee, Flex, Selenium, Subversion, XPath(minor), Photoshop, AppleScript(minor), JQuery.

Travel related

October 2007 – September 2008

Travelled worldwide for a year with 7 months spend in South America and Antarctica. During this time, I developed checklottos.com, 4topnews.com and other sites(now defunct) to solve personal annoyances.

Statcounter, Dublin, Ireland

Contract Work

August 2007 – September 2007

Refracting the existing sole developer's codebase. 34th busiest website worldwide.

Dealing with customers on a daily basis and generation of ideas to move the company forward.

Recommended that Statcounter enter the "Europe Young Entrepreneurs Award" in May which they won.

Skills used: LAMP, Multi Lingual Technology, JavaScript, Customer Support, Mobile Development.

Jeebers, Dublin, Ireland
